Speedwatch Risk Assessment

Hazard Identification	Control Measures/Action	Comments
Are there any sight line difficulties? Does the position of the device cause any difficulties?	Device is not to be located on or near a bend or busy junction. HiVis jackets must be provided. Volunteers must wear jackets at all times.	
Location	The scheme is not suitable for use in the vicinity of an existing speed camera.	
Parked cars and other private property	Ensure the device and signs are not placed near parked cars or private property.	
Is the presence of road works causing difficulties?	If so do not operate at this location.	
Injuries to volunteers	HiVis jackets are provided, these must be worn during the operation, setting up and packing away the equipment. Volunteers must not stand in the road at any time.	
Weather (bad weather conditions)	CSW should not be operational during bad weather periods i.e. fog, mist, snow, sleet, ice, heavy rain and storms.	
Monitoring	Monitoring to be undertaken by a minimum of 2 volunteers at any time. It is recommended that at least one person is equipped with a working mobile phone.
